

Product Brief

Complete Intercom Panel Range

Description

Trilogy's range of intercom systems are supported by an extensive range of versatile, high quality panels designed to offer operators flexibility and intuitive operation.

With choices including lever key and 'Touch', 19 inch rack mount and desktop all manufactured to the same demanding specifications as every Trilogy product, users can be assured of a robust, reliable and easy to use intercom whichever panel they choose.

Trilogy's proven 2U panels have been designed to be installed where you need them and with a depth of only 80mm they offer users great flexibility whilst not sacrificing the very high quality audio the application demands.

Helping to deliver the high quality audio is the 'as standard' ability to individually assign listen levels to each of the targets through the use of the rotary encoder while allowing the panel to stay uncluttered and intuitive to operate.

In addition to the comprehensive range of panels shown in this document Trilogy is also able to offer its latest 'Touch' panels which are detailed in a separate product brief but include a 2U Rackmount, Desktop and Virtual variants.

20 Key 'Touch' desktop
Gemini IP/Gemini/Mercury - 700-47-03
